-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Drawings are objected to under 37 CFR 1.83 because drawings do not illustrate any of the features of independent claim 31. The drawings must show each and every feature of the method claim. Proper correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 31-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claim 31, claim recites in lines 4-8 “normalizing first tristimulus values indicative of a color of the first device using local black point values; transforming the normalized first tristimulus values to obtain color values indicative of modified cone responses of the human eye”. The specification in page 24, lines 16-25, shows in the form of abstract XYZ values are normalized using the luminance and local black point and then transformed through the Bradford matrix to obtain modified responses of

Art Unit: 2621

cones of the human eye. However the specification fails to show how local black points are obtained and why transforming through Bradford matrix provides modified responses of cones of the human eye and what is relationship between Bradford matrix and responses of the human eye. Claims 32-43 are dependent on rejected claim 31 therefore they are also rejection. Applicant is requested to provide proper correction.
